Introduction

Government finance statistics (GFS) data show the economic activities of government in a harmonized and comparable way. They differ noticeably from the budget presentations or public accounting presentations that are nationally specific and not harmonized between countries. GFS data include both the financial (borrowing and lending) and non-financial (income and expenditure) activities of government.

Eurostat collects the data from Member States, Iceland and Norway through the ESA95 transmission programme and also in the context of the Excessive Deficit Procedure. The data are based on national accounts concepts (the European System of National Accounts – ESA95), and therefore "government" in this context does not include trading businesses owned by government. Eurostat publishes these data in Eurostat's public database.

This publication presents an overview of GFS data for each Member State, the EU27 and the Eurozone16, Iceland and Norway in an integrated manner. The data include: government revenue, expenditure, deficit, transactions in assets, transactions in liabilities, other economic flows, and balance sheets. This presentation is similar to that of business accounting where the profit and loss accounts and the balance sheet are presented together, in a linked manner. One of the major advantages of this presentation is that it is possible to see the links between datasets in a "complete picture". For example, if government expenditure exceeds revenue the financial accounts will show how the deficit is being financed through borrowing or running down financial assets such as bank accounts.

Given that the data presented are based on national accounts concepts, there should be full consistency between them, but in practice, due to differences in source data and in the timing of data compilation, there are discrepancies which are presented in separate lines within the tables. The sources for each line of the integrated presentation are described in the annex to the presentation. Users can therefore download data from these areas with, in some cases, greater detail than are presented in this publication. Users will also find comprehensive metadata on the data in Eurostat's public database.

This publication will be updated twice per year, to coincide with the publication by Eurostat of data relating to the Excessive Deficit Procedure. As such it is a "snapshot" of the position at that time, and data may be revised subsequently by countries and be published in Eurostat's public database.

Further information on government finance statistics is available in the dedicated section Government Finance on Eurostat's website <http://ec.europa.eu/eurostat> .

For items 21-23 and 56-70, the data reflect the most recent reporting by Member States to Eurostat. Thus, for years 2006-2009, they reflect the data as officially notified during the April 2010 EDP notification round. However, for years prior 2006, the data may deviate from those first officially notified to Eurostat (e.g. the year 1997 was first notified to the EU Commission in March 1998) but also from those as last officially notified (e.g. the year 1997 was last notified to the EU Commission in September 2001). These deviations may occur due to differences in concepts (e.g. reflecting changes in ESA, or Eurostat decisions), compilation methods, sources data, or other differences in data vintages.

United Kingdom

Item 22: the deficit data reported by the United Kingdom are amended by Eurostat to bring them into compliance with methodological requirements on the accounting treatment on UMTS licences. This amendment to the United Kingdom data has been routinely conducted by Eurostat in past years, and reflects the fact that the national statistical authorities have continued to notify data without taking into account the Eurostat decision of 2000 on the classification of UMTS mobile phone licences proceeds. According to this decision, such proceeds must be recorded as deficit reducing in the year of the allocation of the licences, while the United Kingdom reports such proceeds as accruing during the whole life of the licences.

Items 25 to 54 based on quarterly data (ESA Table 27)

Metadata

Item 22: in principle zero but in practice differences may be observed, mainly arising from Eurostat amendments to reported data, different recording in the respective tables and rounding

Item 59: in principle, item 59 equals item 26, but in practice differences may be observed, mainly arising from different times of delivery of the data (difference in vintages)

Items 1 to 20, 71-72: more details on ESA Table 2 can be found under "Annual government finance statistics" in Government revenue, expenditure and main aggregates
